Subject: Microsoft Settlement

The Microsoft Settlement should be completed.

Programs developed using Microsoft's proprietary programming code obtained under this settlement should be enjoined from stating that the new, non-Microsoft product is in any way compatible with or certified by Microsoft unless it has been submitted to Microsoft for evaluation, testing and determined to be in-fact compatible with MS software or code and or certified by Microsoft.

I have been involved in computation development and consulting since 1970 and feel that this trial was as injudicial as the ATT suit. Sincerely; Delfin J Beltran, MD
